AdminisTEP Launches Nationwide Paper Conversion Service and Online Medical Records Storage

Service enables healthcare organizations to reduce paper storage costs and improves accessibility to documents.

PLANO, TX. — January 13, 2009 — AdminisTEP announced today the availability of a nationwide paper conversion service and online medical records storage. The service converts paper documents into electronic formats to help healthcare organizations reduce storage costs while improving document accessibility.

“Our solution enables organizations to rid themselves of paper and the hassles of searching documents,” said Daren Donnelson, CEO of Legacy. “The solution can be used for any type of document, such as medical records, internal communications, as well as any regulatory, member or provider correspondence.”

Users of the paper conversion service can send their paper-based documents directly to AdminisTEP for scanning, indexing and archiving, or organizations can do the scanning themselves and electronically send the files to AdminisTEP. The electronic documents are accessed via the AdminisTEP portal, where they are securely hosted.

AdminisTEP is a transaction exchange portal (TEP) that manages claims-related processes and streamlines operations with a robust set of tools that enable organizations to instantly know the status of transactions. AdminisTEP bridges the gap between providers, payors and other organizations by directly connecting them with each other for transaction exchanges.

AdminisTEP is a solution offered by Legacy Consulting Services. For more information, visit www.administep.com or call 1-888-751-3271.
