**Hawai'i IPA and AdminisTEP Partner to Launch the First Provider-Payor Portal  
Specifically Designed for the Islands**

*Web-based solution provides robust functionality for Hawaii providers.*

PLANO, TX. — June 10, 2008 — AdminisTEP announced today that it has partnered with the Hawai'i IPA to create the Hawai'i Xchange (HIX), an electronic medical claims submission portal for Hawaii providers. AdminisTEP and the Hawai'i IPA share a multi-tiered agreement, with the first phase being the roll-out of the HIX portal, which launched this month.

HIX uses AdminisTEP as a platform to electronically connect providers with more than 1,200 local and national payors to submit medical claims and receive reimbursement. In addition, HIX enables providers to receive and download explanation of payments (EOPs), fix claims with errors online and resubmit them, as well as track and manage the entire claims process. Additional functionality will be rolled out in subsequent months.

“AdminisTEP enables HIX to have a single solution that can be used by both providers and payors to handle claims electronically,” said Daren Donnelson, CEO of Legacy. “Plus, the flexibility of AdminisTEP allows HIX to address the region’s unique requirements and culture, which is a key component of successfully conducting business on the islands.”

AdminisTEP is a solution offered by Legacy Consulting Services. For more information, visit [www.administep.com](http://www.administep.com) or call 1-888-751-3271.
